

SAFETY

SL-LxxL_Pro incorporates several safety measures to ensure the safety of workers and prevent accidents. The emergency stop button is highlighted as one significant feature, capable of stopping all lifting operation immediately in case of emergency. Our scissor lifts include weight and motion sensors which can prevent tipping over. Additionally, guardrails are installed to eliminate the risk of accidental falls. By implementing these safety features, workers can safely and confidently accomplish their tasks effectively.

ABOUT COMPANY

Our company was established from the collaboration of a group of engineers who share the same interest in producing high quality scissor lifts. By combining our distinctive skills, resources, and experiences, we established a business that aims to deliver inventive and reliable equipment to our clients.

Our passion for engineering and our commitment to ensuring customer satisfaction have empowered us to succeed in the industry. We take great pride in our products knowing that each scissor lift we manufacture is of superior quality. Although starting a business with friends can be challenging, our determination have helped us overcome any obstacles we have faced along the way.

As we expand our product range and develop our business, we continue to be committed to provide excellent service and support to our clients. Our ultimate goal is to become #1 scissor lifts provider, and we are excited to discover where our journey takes us.

ENHANCED SAFETY.
IMPROVED CONTROL.
ENVIRONMENTALLY FRIENDLY.
LOW MAINTENANCE.

Our Mission

our mission is to supply simple, safe, and reliable lifting solutions by maintaining a dedication to excellence, innovation, and quality engineering. Our team comprises hard-working individuals who work day and night to produce the highest-quality scissor lifts in the industry. Our customers are the key that drives our company forward.

WHO WE ARE

Our team comprises experienced engineering, design, and manufacturing experts who bring decades of experience to develop our products. We also work closely with our customers to understand their specific needs. We use cutting-edge technology and manufacturing facilities to design and manufacture scissor lifts that meet stringent quality standards and exceed the customer's expectations
